

WEATHER ADVISORY

Ref No: EW/Met 25/04/2022/008

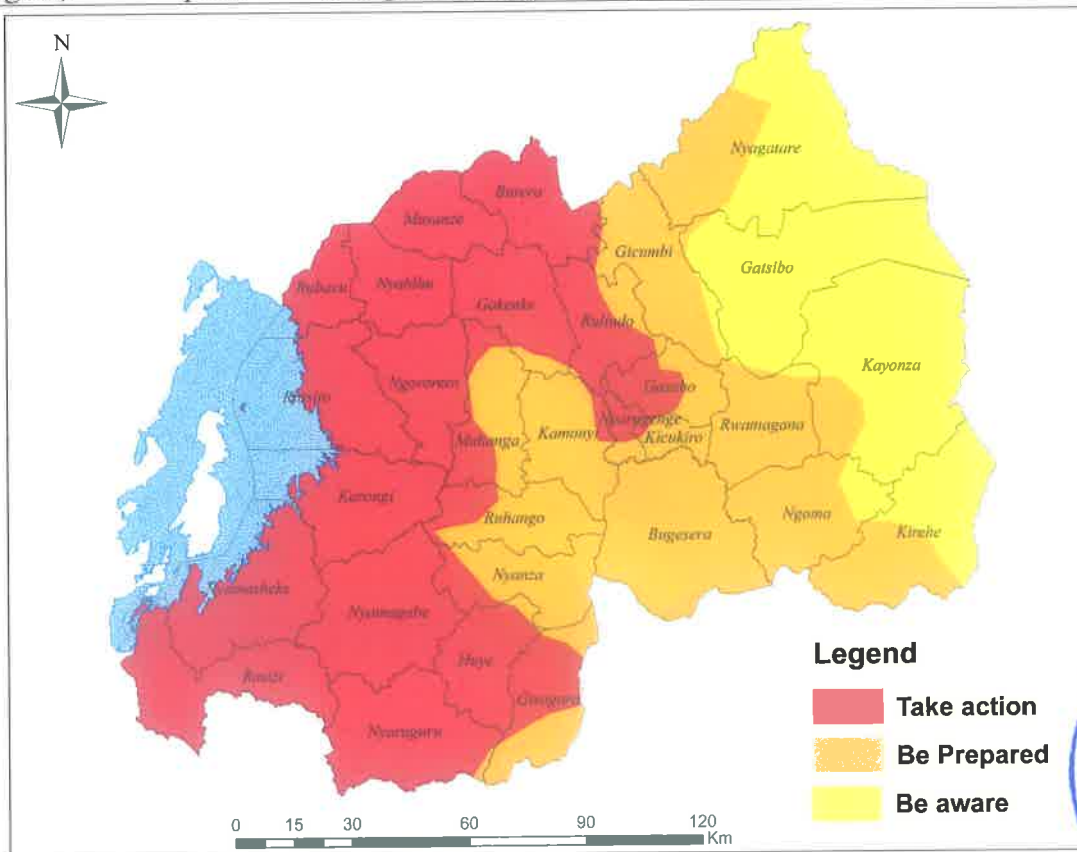

Kigali, 25th April/2022

Heavy Rains

Valid between 25th April 2022 and 27th April 2022

Reference is made to the ten days' weather forecast released on 20th April 2022 by Meteo Rwanda, where above normal rainfall countrywide was predicted between 21st and 30th April 2022. Meteo Rwanda would like to inform Rwandan citizens that heavy rainfall is likely to continue up to 30th April 2022, especially from 25th night to 27th April 2022 over Northern, Western, Kigali City and Nyamagabe, Nyaruguru, Huye, Gisagara, western parts of Muhanga, Ruhango and Nyanza districts.

Likely Impacts

- Severe widespread flooding to major rivers, lakes and catchments,
- Landslides in steep slope areas
- Damage to infrastructure.

Advice

Due to accumulated rainfall in the past days in most parts of the country and expected rains in coming days, contingency measures should be put in place to avoid likelihoods of negative impacts associated with expected increased rainfall especially in disaster prone areas.
