

RS ISO 9001:2015 CERTIFIED

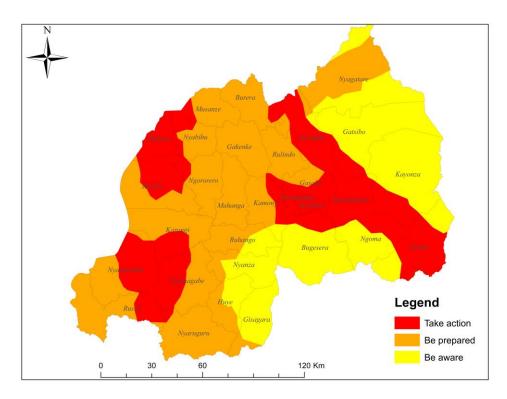

027/MET/ 016/09 | V. 02 (2024/09/15)

17th October 2024

WEATHER	ADVISORY
---------	-----------------

Ref No: EW/Met 17/10/2024/011

Based on the previous weather conditions, where some parts of the country received less rainfall. Based on the current weather forecast, which is indicating increased rainfall across the country, heavy rainfall is expected in most parts of the country between the night of 17th October and 21st October 2024. Enhanced rainfall (see red color in the map below) is expected in Kigali City, Rubavu, Rutsiro, Karongi, Nyamasheke, Nyamagabe, Rusizi, Gicumbi, Rwamagana and Kirehe Distrists as well as in some parts of Musanze, Nyabihu, Ngororero, Kamonyi, Bugesera and Ngoma Districts. Expected rainfall amount during this period is ranging between 10 and 50 mm per day. Moderate to strong wind ranging between 4m/s and 8m/s, is also expected during this five days.

Color coding

Take action regarding expected heavy rainfall accompanied with strong wind
